

Radio E F & I

Our E F & I radio department is ready to build your complete microwave radio system. We can Engineer, Furnish and Install everything you need, from concept through final documentation. We are your "one stop shop."

• Engineer:

- Site and Path Surveys, Path Engineering, System Engineering
- Frequency Searches, Public Notices and License Application and Filing
- Application Engineering to Include All Peripheral Equipment Through DS-O
- New Systems, Analog to Digital Upgrades, System Expansions
- Any interface, DS-1, DS-3, OC-3, Wideband Data, Ethernet
- Drawings, Manuals and Mark-ups in Auto-Cad

• Furnish:

- Microwave Radios, All Bands, Licensed or Unlicensed
- Antennas, Transmission Lines, Pressure Equipment
- Multiplexers, Any Interface
- DACCS, DSX Panels, Loop Protections Switches
- Channel Banks, Mini DACCS, Terminal Connections
- DC Power Systems: Chargers and Batteries
- Alarm and Network Manager Systems

• Install:

- New installations at your site or in portable shelters at our site
- Expansions and additions to your existing system.
- Replacements and in-service cutovers with minimal service interruption.
- Testing, acceptance testing and component and system troubleshooting.

CES uses the highest technical standards in every area. We design your system to meet your traffic and budget needs, now and for years to come. We furnish equipment from a wide selection of possibilities, taking your needs as first priority, to make the equipment match the needs and the budget. We use the highest installation standards possible, and use only qualified and trained technicians.

Clearly, CES is your best choice for all your microwave radio needs!
